Easy Handling

The GoodsMan 350 L is a significant leap forward for shifting anything from a van to your door, around your premises and really comes into its own over distances of grass, gravel and slopes.

Sharing the same attributes as the GoodsMan 350 but benefitting from a 12" wheel for better transit over the roughest of terrain.

Fast and efficient so saving time and providing a cost-efficient solution yet reducing risk of damage to goods and people.

With a capacity of up to 450kg with the optional 3rd wheel attached this electric sack truck makes light work of moving your work.

Simply put; it's safe, easy to use, versatile and robust.

This model can include rubber frame protection but does come with a security strap and resin filled tyres for self-healing after a puncture.

- Ergonomically designed tillerlever is easy to use - even in your gloves
- Forward and reverse drive
- 2 speed operation for safe and easy transit over even the roughest terrains
- Torque assisted movement to transit position
- Weatherproof
- Battery charge monitor
- Right and left handed drive
- Lightweight
- 1 year return to base limited warranty

The detachable 3rd wheel gives the added benefit of the machine being able to be a powered trolley making the movement of larger, heavier, taller or voluminous goods a mere stroll on a longer journey, when removed, the GoodsMan L takes up no more space than a manual sack truck.
